PRODUCT DATA SHEET

Type Ball Bearing	Code 52470
Steel Ball Bearings with nylon lining and incorporated pin screw.	

General Features

Series TRV

MATERIALS

These bearings are made with lead steel rings and screw pins, hardened and subject to a passivating galvanising treatment. The outer ring diameter is lined with glass-fibre reinforced Nylon 6. The balls are also made of hardened 100C6 chrome steel.

TECHNICAL FEATURES

The ball-filled construction process ensures a superior load-carrying capacity, while the Nylon lining guarantees perfectly smooth running. The incorporated pin allows for easy mounting.

APPLICATIONS

Drawers and doors of metal and wooden furniture, workbench drawers, concealed sliding doors, doors and window frames in general, baskets for refrigerators and dishwashers, gravity rollers, small overhead conveyors.

Manufacturer's statement: Resistance temperature is 80 degrees celsius.

Sizes

Bearing d24 in steel with lining, pin Tedesco

D	d	D1	B1	B2
24	M6	10	5	10

(all dimensions are given in mm)

Also available with squared external ring
