

A stainless steel serving trolley with three shelves and four casters is positioned in a canteen. The top shelf holds a basket of oranges and several bags of snacks. The middle shelf has two jars of jam and a stack of plates. The bottom shelf is empty. The background shows a canteen with tables, chairs, and a kitchen area.

B.PRO
CATERING SOLUTIONS

ONE FOR ALL

**The serving and clearing trolleys from B.PRO Catering Solutions.
Durably reliable.**

READY FOR ANYTHING!

TOUGH. TROLLEYS. WITH AN EXTRA
STURDY DESIGN AND
HIGH-QUALITY MORE SERVICE
PROCESSING, THEY
TRANSPORT EVERY-
THING THAT IS
LOADED ONTO MORE OPTIONS
THEM – LIGHT AND
EASY TO MANOEUVRE,
MORE QUALITY REGARDLESS
OF HOW FAR THEY
NEED TO GO.

TOUGH. TROLLEYS.

The perfect mobile assistants made of stainless steel.
They can certainly take a lot.

TYPICAL B.PRO: MORE QUALITY.
MORE SERVICE. MORE OPTIONS.

In the food service, hotel and commercial catering sectors, peak times can often be a little chaotic. Large quantities of dishes have to be transported as quickly as possible, day in, day out.

READY FOR ANYTHING The serving and transport trolleys by B.PRO Catering Solutions are extra-sturdy, top-quality companions. They transport everything that is loaded onto them – light and easy to manoeuvre, regardless of how far they need to go.

THE PERFECT SIZE FOR EVERYTHING Whether transport, temporary storage or tidying away, the range of serving and clearing trolleys covers a wide variety of applications. The most common serving and clearing trolleys are available from stock and are therefore ready for service in no time.

CLEAR B.BENEFITS

FIRMLY CONNECTED

Perfectly welded, continuous seams connect and stabilise tube frames and shelves. This ensures a good hold. Forever.

BROKEN GLASS DOESN'T STAND A CHANCE

Even if things get a little rough underfoot or a sharp corner awaits, the all-round, raised profile edge on every shelf makes sure nothing falls off.

STURDY AND SAFE

A large, deep-drawn profile edge and curled edges not only make the shelves super sturdy and resilient. They also provide protection against cuts and scratches at work.

SMOOTH RUNNING AT ITS FINEST

Under every shelf, an antidrumming mat acts like a noise damper. Rolling noises are therefore significantly reduced.

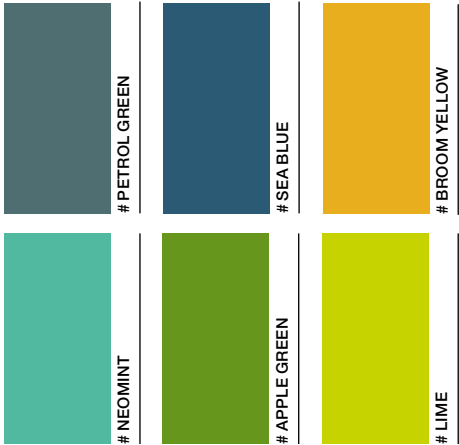

BUMP-RESISTANT

A standard feature: The sturdy bumper rail protects the trolley and loaded items against scratches and scrapes.

NICE VIEW

Privacy shield and attractive panelling in one.
Transformed in an instant.

THE SIDE WALLS:
SIMPLE TO HOOK IN
AND JUST AS EASY TO
REMOVE.

PANELLING FOR B.PRO SERVING TROLLEYS

Hides everything that doesn't need to be seen. And protects everything that needs to stay clean: Used or clean dishes simply disappear behind closed doors.

The sturdy side walls are easy to hook in: Just clip in behind the edge of the upper shelf and fasten on the lower shelf – done. It is also simple to remove and makes cleaning easier.

The three-sided panelling is available with or without hinged doors. When open, the doors can be locked within the bumper rail – this makes manoeuvring easy and prevents damage.

In addition to stainless steel, the panelling is available in twelve different colours, all of which make the serving trolley a real eye-catcher in any surroundings.

The **B.PRO KIDS SERVING TROLLEY** makes nursery and school catering child's play. With its low height, young guests can reach all surfaces of the trolley with ease.

SW-KIDS

B.PRO Kids serving trolley.
Small. Safe. Silent.

THE SPACE BOOSTER

The worktop for attaching onto a serving trolley creates a highly practical, mobile chopping area for preparation and serving in next to no time.

WORKTOP The star of the show is the stainless-steel worktop. It fits perfectly on almost every existing B.PRO 8 x 5 serving trolley. No special fixtures are necessary and the worktop can be removed again at any time. It features two cut-outs for inserting two GN 1/3-65 for transporting chopped ingredients or for use as catch trays.

Sneeze guard for serving trolley With the optional sneeze guard, your 8 x 5 serving trolley is also suitable for flexible, mobile serving. The sneeze guard is extra-light and can be retrofitted to almost all SW 8 x 5 trolleys.

Plastic chopping board The chopping board sits firmly on the worktop and is optimally matched to the integrated GN containers. Practical: A juice groove drains into the GN containers on the worktop.

Knife holder for positioning on GN 1/6 With the dishwasher-safe knife holder, knives can be stored in every deep GN 1/6. Since the knife holder does not cover the entire container, there's still enough space for tongs, spoons or other cooking utensils.

Hanging frame for GN containers, incl. bracket for paper towel rolls The hanging frame creates even more storage options. It is quick and easy to hook on and off and provides sufficient space for 3 GN 1/6. Everything at hand: The frame also features a bracket for a paper towel roll.

THE PERFECT ADDITION TO THE B.PRO FRONT COOKING STATION.

CLEARING STATION MEETS CUTLERY ATTACHMENT

Quite simple: B.PRO serving trolleys as mobile and flexible solutions for clearing.

MOBILE CLEARING STATION: QUICKLY SORTED AND AWAY! With the serving trolley as a basis, the clearing station is perfect for collecting, sorting and returning trays, dishes and cutlery for up to 45 guests. Clever details and a privacy shield with labelling options boost efficiency even further.

Whether in beer gardens or at events, the mobile clearing station helps to combine work processes, saving time when things get hectic.

Perfect for self-service: Helping to clear away after meals is an important aspect of how to deal with resources in schools and nurseries. The clearing station offers a simple and organised solution for sorting trays, plates, cutlery and glass as well as residual waste and paper. Easily manoeuvrable castors guarantee a smooth journey back to the dishwashing area.

Drip tray for collecting glasses and cups

The stainless-steel drip tray fits perfectly onto the top shelf and features two integrated support bars on the base. Simply place the glass rack on top, and liquids drip onto the drip tray below.

Hanging frame for GN containers The frame makes it possible to use GN containers for cutlery or as collection containers on the side.

Shelf for trays The shelf for depositing trays is quick and easy to attach. It can be mounted at standard height (approx. 850 mm) or at children's height (approx. 700 mm) simply by turning it.

Serving trolley with cutlery attachment

Combined with the SW 10 x 6, the cutlery attachment offers ample space for cutlery, trays, dishes, napkins and condiments. It can be fitted at any time and easily removed afterwards. Firm screw connections guarantee maximum stability. Incl. 5 GN 1/4-150 stainless-steel cutlery holders with transparent, half-flap Plexiglas cover.

DESIGN	GDD top-mounted frame		
Infos	for the correct storage of Gastro- norm lids with form-fitting seal For the models: SW 10 x 6-2, SW 10 x 6-2 BASIC, SW 10 x 6-3 BASIC GDD, top-mounted frame can also be used without serving trolley		
Order No.	574 167		

**Storage and transport for
Gastronorm lids with seal**
The GDD top-mounted frame
is the ideal solution for the
correct storage, drying,
transport and dispensing of
Gastronorm lids with form-
fitting seal. Through its special
geometry, it fits perfectly on
10 x 6 serving trolley shelves.
It can hold up to 30 GN 1/1
Gastronorm lids or a large
variety of smaller lids.

To go with the top-mounted
frame, the serving trolley
SW 10 x 6-3 BASIC GDD is
available. Thanks to the larger
distance between shelves,
every shelf can accommodate
a GDD top-mounted frame.
The serving trolley therefore
offers optimal mobile storage
for large volumes.

SW 10 x 6 BASIC GDD
